3. REPORTING PRINCIPLES

Principles of accounting for capital and capital utilization of the Bank are:

- Due to the nature of business operations and the implementation of policies on balance management between funding sources – usages of funding, credit risk management, proceeds from each bond issuance and from other funding sources are pooled into one capital pool of the Bank. This capital pool is used for the Bank's operations, in which priority is given to credit activities based on the Bank's comprehensive funding management and risk policies.
- The Bank shall assign unique code for each loan determined as being funded from the proceeds of bond issuances and separately monitor them.
- The Report on the use of proceeds from the bond issuance only presents the initial use of capital and does not present subsequent reutilization of these proceeds (if any).
- The Report on the use of proceeds from the bond issuance only reflects information on the use of proceeds from outstanding bonds during the reporting period, in which:
 - Item: "Actual use of proceeds from the bond issuances accumulated up to 31 December 2025" is the actual disbursed amount of loans which are coded by the Bank as being funded from the proceeds from individual bonds issued and are outstanding as at 31 December 2025.
